

1. FULL PYRAMID

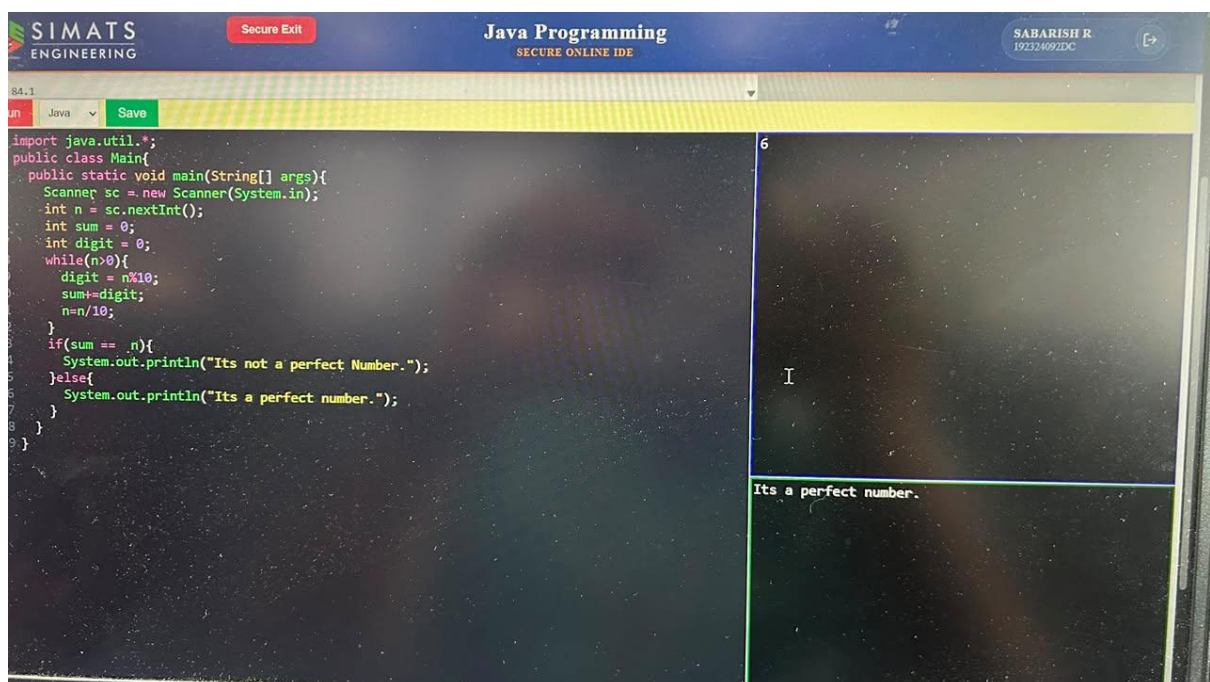

```
import java.util.*;
public class Main{
    public static void main(String[] args){
        Scanner sc = new Scanner(System.in);
        int n = sc.nextInt();
        for(int i=1;i<=n;i++){
            for(int j=1;j<=i;j++){
                System.out.print(" ");
                for(int k=1;k<=(2*j-1);k++){
                    System.out.print("*");
                }
                System.out.println();
            }
        }
    }
}
```

1
3
5
7
9

1
3
5
7
9

2. PERFECT NUMBER

```
import java.util.*;
public class Main{
    public static void main(String[] args){
        Scanner sc = new Scanner(System.in);
        int n = sc.nextInt();
        int sum = 0;
        int digit = 0;
        while(n>0){
            digit = n%10;
            sum+=digit;
            n=n/10;
        }
        if(sum == n){
            System.out.println("Its not a perfect Number.");
        }else{
            System.out.println("Its a perfect number.");
        }
    }
}
```

6

Its a perfect number.

3.FREQUENCY

The screenshot shows the SIMATS ENGINEERING Java Programming IDE. The code in the editor is as follows:

```
import java.util.*;
public class Main{
    public static void main(String[] args){
        Scanner sc = new Scanner(System.in);
        int n = sc.nextInt();
        for(int i=0;i<n;i++){
            for(int j=0;j<=i;j++){
                System.out.println("frequency:"+3*i);
            }
        }
    }
}
```

The output area on the right shows the prompt "Your INPUT here. Give only values (e.g., 10, not a=10)". Below the input area, an exception is displayed:

```
Exception in thread "main"
java.util.NoSuchElementException
    at
    java.base/java.util.Scanner.throwFor(Scanner.java:937)
    at
    java.base/java.util.Scanner.next(Scanner.java:1594)
    at
    java.base/java.util.Scanner.nextInt(Scanner.java:2258)
    at
    java.base/java.util.Scanner.nextInt(Scanner.java:2212)
    at Main.main(Main.java:5)
```

4.STRING PRESENT

The screenshot shows the SIMATS ENGINEERING Java Programming IDE. The code in the editor is as follows:

```
import java.util.*;
public class Main{
    public static void main(String[] args){
        Scanner sc = new Scanner(System.in);
        String str = sc.nextLine();
        if(str.indexOf("p")==-1){
            System.out.println("Element not found.");
        }else{
            System.out.println("Element found");
        }
    }
}
```

The output area on the right shows the input "I am a programmer" and the resulting output "Element found".
